Protect Those Pipes!

We talk a lot about protecting pipes in the winter months, but did you know, pipes need year-round protection!

Below are some of the biggest culprits when it comes to clogged pipes and BIG plumbing bills. Make sure everyone in your household knows that **ONLY** toilet paper gets the flush!

- **Hygiene Products:** Thought they may seem harmless, items like dental floss, cotton balls, and first aid products (like bandages and gauze) can lead to expensive clogs.
- **Cooking fat and grease:** Try pouring cooled grease into a paper cup, leftover food carton, or some tin foil and then a plastic bag before discarding in the trash!
- **Leftover and expired medication:** Both prescription and over-the-counter medications should be disposed of properly to avoid contaminating local water supplies.
- **Feminine Products:** By design, these products absorb liquid instead of biodegrading. Keep them out of your pipes if you want to avoid a costly plumbing bill!
- **Household Chemicals and Paint:** Flushing leftover liquid chemicals might seem like the easy way out, but many can be corrosive or cause clogs that damage the pipes as well as the water supply.

- **Paper Towels, Tissues, Wipes:** Tissue paper is designed to be extra thin and break down quickly. These products, on the other hand, are designed to be stronger and hold up longer. These can sit in your pipes and cause big clogs!

As of April 1st, Jonah Water is under Stage 1 (voluntary) drought restrictions, let's work together to conserve water and can keep it that way! Help out by washing vehicles at the carwash, avoid water-heavy landscaping (like fountains, non-native plants), and use the dishwasher instead of washing by hand!

To stay up to date with drought restrictions, conservation efforts and ideas, and find more ways to stay cool, follow us on social media!

WATER WISE

Issue 6: Q2 Spring 2024 By

Look for leaks! Now that we've thawed out from winter weather, it's the perfect time to check your home for water leaks! Look carefully in kitchens, bathrooms, and laundry areas for any wetness, including behind appliances. If you suspect a leaky toilet, place a few drops of food coloring into the tank and wait overnight to see if the color changes in the bowl without flushing by the morning, if it does, you've got a leak!

Hint: Think you might see a leak in a Jonah water line? Let us know and if we find one, you can save \$20 off your next water bill!

**SEE A LEAK?
YOU COULD
SAVE!**
